

# 218 - LINSEED OIL

LINSEED OIL is a vegetable oil for treatment and maintenance of all solid wood. The oil leaves a 100% biological surface and underlines the original natural structure of the wood. Provides the surface with a beautiful, long-lasting and resistant surface, protecting against dirt, moisture and drying out. Lighter woods will attain a light yellow color.

## Instructions

Apply generously with a cloth or brush and wipe off excess oil after 1 hour. New or dried up wood requires repeated treatment; however, the oil must be left to harden at least 24 hours between each application.

## Declaration

Contains: 100% refined linseed oil.

**WARNING:** Used rags may self-ignite and should therefore be soaked in water and packed airtight in aluminium foil or in a plastic bag before discarding.

## Conditioning

250ml (12 units/box) / 500ml (12 units/box)
